# ANURAG SHARMA

Jaipur, Rajasthan, INDIA • +919079742387 • anuragbtp561@gmail.com

Python Developer (Fresher) with strong understanding of **functions, global & local variables, loops, conditionals and basic OOP concepts**.Hands-on experience in building **mini Python applications like Bank Management System and Calculator** using real-world logic. Eager to work in a growth-oriented company where I can apply my programming skills and continuously improve.

## Experience

JULY 2024 – SEP 2024
**Web Development Intern| Vanillkart | Remote.**

Analyzed problems and worked with teams to develop solutions Sorted and organized files, spreadsheets, and reports. Assisted in SEO optimization to improve site visibility and search engine ranking. customized themes and plugins for enhanced website functionality. Explored technologies and approaches to streamline processes. Implemented digital marketing strategies to reach a broader audience. Participated in workshops and presentations related to projects to gain knowledge.

## Skills-

### Technical skills-
•python • C++ • OOPS • Vs code • Jupyter notebook

### soft skills-
•Communication skills •Problem solving •Teamwork •Adaptability and Flexibility •Critical Thinking

## Education

2022 – 2025
**Bachelor of Technical Education (CSE) | Rajasthan Technical University | Rajasthan**

SEPT. 2018 - NOV. 2021
**Diploma (CE)| Board of secondary education | Rajasthan**

## Project

**Project title - Smart Home Security System (Team Project)**

Designed and developed a low-cost smart home security system using a
GSM module. Notified homeowners or emergency services upon detecting security breaches

-Motion detection.
-Automatic phone calling.
-Remote monitoring -Liser-friendly interface.

**. Bank Management System (Python)**

- Developed a console-based bank application using Python
- Features:
  - Account creation
  - Deposit & withdrawal
  - Balance enquiry
- Used **functions** for modular code
- Implemented **global and local variables** for account balance handling
- Focused on clean logic and user-friendly flow

**. Calculator Application (Python)**

- Built a calculator using Python functions
- Supported operations:
  - Addition, Subtraction, Multiplication, Division
- Used conditional statements and reusable functions
- Improved code readability and error handling
